

Total home renovators

The Trade Team has carved out a fine reputation for its practical, elegant bathroom renovations which clients love. But that's not all owner Mark Higson and his talented team can do — their expertise lends itself to every area of home renovation work. What's more, the reliable team ensures clients receive value for money and the best quality workmanship.

Here is an example of what this skilled team can do.

In order to make room for a spacious new kitchen, Mark and The Trade Team extended the room into the courtyard. From the exterior, the extension has squared off the house, meaning the renovation goes unnoticed and doesn't look like an 'add-on'. The flexible team was happy to use the existing windows and French doors, ensuring extra costs were kept down.

Bathrooms and kitchens are a real specialty for The Trade Team. This bathroom was completely designed, built and installed by The Trade Team, replacing a cramped, outdated one. The large shower and custom-built cabinetry are two features many clients choose.

The small, wedge-shaped kitchen was completely redesigned and transformed into a large, Shaker-style work area. The Trade Team was responsible for all the building, plastering, painting, plumbing and the end result is a fantastic, functional kitchen. Mark and the team regularly employ a reliable network of subcontractors including Kitchen Craft.

The Trade Team's service isn't only restricted indoors. The team transformed what was originally a children's play spot into this practical, sheltered spa area. Timber complements the original decking and the job, a relatively straightforward one, was completed within a week.
